DigiMine CEO Catches the Attention of MIT

By The seattle.internet.com Team

Technology Review, an MIT publication, has selected digiMine President and CEO Dr. Usama Fayyad as a representative of the field of data mining for the Technology Review Ten (TR10).

The TR10 is a list of 10 emerging technology fields - each represented by one individual - that will have a profound impact on the economy and how we live and work, as determined by the editors of Technology Review.

The January/February 2001 issue of Technology Review profiles Dr. Fayyad's career as a data mining pioneer and describes his newest role as CEO of Kirkland-based digiMine (www.digiMine.com).
